## WORK EXPERIENCE

---

### **Kwalee**

*Bengaluru, Karnataka*

#### **Software Engineer – SDK**

*Jun 2026 – Oct 2026*

- Fixed progression-loading issues in shared Unity systems, including a soft lock when players reconnected to the internet.
- Integrated ContextSDK into Queens Master to track gameplay, purchases and ad events, buffering events during startup to prevent missing data.
- Added installation resets, ad controls and game-state information to in-game debug tools for developers and QA.
- Built Unity Editor tools to launch games through their startup scene and restore the previous scene after testing.

### **Light and Wonder**

*Bengaluru, Karnataka*

#### **Software Engineer – Unity**

*Sep 2025 – May 2026*

- Developed gameplay and pull-tab mechanics in Unity and C# for regulated charitable gaming titles, integrating features with cabinet frontend systems.
- Fixed gameplay defects and optimized runtime performance to improve game stability.
- Built a Unity tool to replace compiled DLLs with source scripts while preserving references for source-level debugging.

### **Kwalee**

*Bengaluru, Karnataka*

#### **Software Engineer – SDK**

*Apr 2023 – Aug 2025*

- Supported Police Pursuit, Landlord and Traffic Cop through Unity SDK integration and bug fixes.
- Built a reusable in-app purchase system with subscriptions, purchase restoration, localized prices and product caching.
- Built an SDK testing framework for the Unity Editor and mobile devices, with grouped test runs, result reporting and AltTester integration in Jenkins builds.
- Created a configurable Unity Editor tool to check and correct asset names and folder structures.

### **Yudiz Solutions**

*Ahmedabad, Gujarat*

#### **Jr. Unity Game Developer**

*Apr 2021 – Mar 2023*

- Developed gameplay logic for Phase10 and 2048 Battle (MPL) using Unity and C#.
- Implemented game mechanics and level features, and resolved gameplay issues in casual and card games.
- Contributed to planning and maintaining codebases for casual and card game projects.

## TECHNICAL SKILLS

---

**Languages:** C#, Java, Python, JavaScript

**Game Development:** Unity, Android/iOS, WebGL, Game UI, TextMeshPro, Localization

**SDKs and Tools:** Editor Extensions, UI Toolkit, Unity IAP, AppLovin MAX, AppsFlyer, Firebase

**Testing and Workflow:** AltTester, Automated Testing, Jenkins, CI/CD, Git, Perforce

## EDUCATION

---

GLS University

*Ahmedabad, Gujarat*

*Master of Computer Applications*

*Jan 2021*
